To Whom It May Concern,

This is to explain that I am applying for surface water rights for a small, second home (under 400 sq. feet) where I would stay mostly during the week. I teach at Clallam Bay Correctional Center and go home to my family, over by Steven's Pass, on the weekends.

I plan to tap into a water system that is already being used by two families that live out there (see the other surface water right certificate).

I am hoping to get water rights in perpetuity as soon as possible. But if that is a problem I would appreciate water rights to the land (not myself) for up to 15 years (length of the loan).

I know that you are busy, but I have been trying to purchase this land for several months and want be able to move to it by the Fall.

Thank you for your consideration.

Sincerely,

Bradley Cole

In accordance with Section 90.03.290 RCW, I find that there is water available for appropriation from the source in question and that the diversion as recommended above will not impair existing rights or be detrimental to the public welfare. Therefore, permit should issue, subject to existing rights and indicated provisions.
